*I enjoy discovering what each opportunity has to teach, always finding something intriguing to see and do.*

## Skills

**Development** | React, Angular js, Flutter, NodeJS, TypeScript, Javascript, Java, RxJS, Redux, Tailwind, MUI, Html, Css, Wordpress,Git
**Others** | Aws Lambda y Cognito, PostgreSQL, DynamoDB, Firebase: Storage, Authentication, Cloud Messaging , Stripe
**Soft Skills** | Proactive, Adaptable, Self-taught, Time Management, Project Management

## Experience

**Software Engineer | Flutter Developer**  - Pickup Jobs - 11/2024 - 03/2025
- I contributed to the development of both client and admin apps in Flutter for Android and iOS, creating a functional prototype (MVP). I worked from an intermediate starting point until the app was fully operational.

- I implemented features using Firebase Storage, notifications with Firebase, and authentication with Google and Apple. Additionally, I integrated some functionalities with Stripe to manage test-mode payments.

- Beyond development, I gained experience using tools such as Trello, GitHub, Figma, and Apple Development.

**Software Engineer  | Web Developer** - Legal Badger -*05/2021 - 05/2023*

- I collaborated on frontend development using AngularJS, RxJS, and Tailwind, achieving a functional MVP demonstration. Additionally, I contributed to backend development with Java, Spring Boot, RabbitMQ, and PostgreSQL, supporting the full-stack developer responsible for the project.

- After the project's initial phase, I participated in implementing a new frontend using React with NextJS, Redux, and MUI, integrating services such as AWS Lambda and AWS Cognito, alongside other technologies like PostgreSQL, RxJS, and DynamoDB. On the backend, I assisted with development in Node.js and TypeScript, focusing primarily on endpoints and AWS service implementations.

- Beyond development, I gained experience working with Scrum methodologies, including different sprints and project stages. I also became proficient in tools like Jira, Figma, Git ,collaborating in teams with branches and pull requests, and Slack.

**Professional Internships**
- Asitecno - Quito, Ecuador : Contributed to the development of internal automation projects, as well as the creation and management of web applications for clients (02/2024- 06/2024). I also managed a document digitization project from planning to execution  (09/2023 - 01/2024)
- Shockoe - VA, USA: Assisted in debugging and design improvements for websites based on approved designs (09/2019 - 12/2019)

## Projects

- **SlackBot with SpreadSheets** - *03/2021 :* Developed a Slack bot that automates food order requests and stores them in a Google Spreadsheet . Readme
- **Taski** - *12/2022 :* Task manager built with React, Redux, and Tailwind. Readme, page
- **Cryptocurrency Mining** - *Desde 2021:* Built and managed a cryptocurrency mining project with a total investment of approximately $20,000. Designed, configured, and maintained hardware, from hardware selection to efficient mining optimization.
- **YouTube/Facebook** - *2015-2016* : Created and monetized multimedia content, developing skills in video and image editing as well as digital marketing

## Education

**Universidad San Francisco de Quito -** December 2024
Bachelor's in Computer Science

## Languages

Spanish – Native

English – B2 (Upper-Intermediate)

## Exchange Programs

*Virginia Commonwealth University 08/2019 - 12/2019:* Completed an intensive English semester at VCU as part of an exchange program

Summer Work Experience in the USA Sant Ambroeus Restaurant, Southampton, NY (2022 - 2024) Golden Pear Cafe and Publick house, Southampton, NY (2021)
